C.I. HAYES INSTALLS PUSHER FURNACE FOR BRAZING AND HEAT TREATING

C.I. Hayes, a Gasbarre Furnace Group Company, is pleased to announce the recent installation of a Model BA-M Atmosphere Pusher Furnace for brazing and general heat treating of stainless steel materials by a dedicated processor of select cutlery product lines. This is the third C.I. Hayes furnace in use by this customer. The furnace is equipped with a rigid chain indexing drive, silicon carbide heating elements and a controlled atmosphere system that includes an analyzer for dewpoint and oxygen level monitoring plus purge verification. The furnace design has a maximum operating temperature of 2100°F (1148°C). For automatic load and unload queuing of work, the furnace is complete with a powered roll return conveyance system with right angle transfers.

Located in Cranston, RI, C.I. Hayes designs, manufactures and services industrial vacuum and atmosphere heat treating equipment and has been delivering custom solutions to the heat treating industry for 109 years.
